## NUCLEAR REGULATORY COMMISSION

[Docket No. 72-08; NRC-2011-0085]

### License Renewal for Calvert Cliffs Nuclear Power Plant, LLC's

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Environmental assessment and finding of no significant impact; issuance.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering the renewal of NRC License SNM-2505 for the continued operation of the Independent Spent Fuel Storage Installation (ISFSI) at the Calvert Cliffs Nuclear Power Plant site near Lusby, Maryland. The NRC has prepared an Environmental Assessment (EA) of this proposed license renewal in accordance with its regulations. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The NRC also is conducting a safety evaluation of the proposed license renewal.

**ADDRESSES:** Please refer to Docket ID **NRC-2011-0085** when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and are publicly-available, using the following methods:

- **Federal Rulemaking Web site:** Go to <http://www.regulations.gov> and search for Docket ID **NRC-2011-0085**. Address questions about NRC dockets to Carol Gallagher; telephone: 301-492-3668; e-mail: [Carol.Gallagher@nrc.gov](mailto:Carol.Gallagher@nrc.gov).

- **NRC's Agencywide Documents Access and Management System (ADAMS):**

You may access publicly-available documents online in the NRC Library at

<http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "[ADAMS Public Documents](#)" and then select "[Begin Web-based ADAMS Search](#)." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov). The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

**FOR FURTHER INFORMATION CONTACT:** James R. Park, Project Manager, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-6935; e-mail: [James.Park@nrc.gov](mailto:James.Park@nrc.gov).

**SUPPLEMENTARY INFORMATION:**

**I. Environmental Assessment Summary**

By letter dated September 17, 2010, Calvert Cliffs Nuclear Power Plant, LLC (CCNPP) submitted an application to the NRC to renew NRC License SNM-2505 for the CCNPP site-specific Independent Spent Fuel Storage Installation (ISFSI) that expires on November 30, 2012. CCNPP is requesting renewal of NRC License SNM-2505 for a 40-year period to authorize CCNPP to continue ISFSI operations at the Calvert Cliffs site near Lusby, Maryland.

CCNPP supplemented its application on February 10, 2011. On March 11, 2011, the NRC staff found CCNPP's application to be acceptable for a detailed review. In response to NRC staff requests for additional information, CCNPP provided supplemental information on June 14, June 28, and December 15, 2011.

The NRC staff has prepared an EA to document its environmental review of the proposed license renewal. The NRC staff considered the following environmental resource areas in its evaluation: land use; transportation; socioeconomics; air quality; water quality and use; geology and soils; ecology; noise; historical and cultural; scenic and visual; public and occupational health and safety; and waste management. Based on the NRC staff's evaluation, the potential environmental impacts on these resource areas were determined to be small. In its license renewal request, CCNPP is proposing no changes in how it handles or stores spent fuel at the ISFSI, and no significant changes in CCNPP's authorized operations for the ISFSI are planned during the proposed license renewal period. Approval of the proposed action is not expected to result in any new construction or expansion of the existing ISFSI footprint beyond that previously approved by the NRC. The ISFSI is a passive facility that produces no liquid or gaseous effluents and requires no power or regular maintenance. No significant radiological or non-radiological impacts are expected from continued normal operations. Occupational dose estimates from routine monitoring activities and transfer of spent fuel for disposal are expected to be maintained as low as is reasonably achievable and are expected to be within the limits of Title 10 of the *Code of Federal Regulations* (10 CFR) 20.1201. The estimated annual dose to the nearest potential member of the public from ISFSI activities is less than 0.02 mSv/yr (2 mrem/yr), which is significantly less than limits specified in 10 CFR 72.104 and 10 CFR 20.1301(a). The staff concluded that the proposed 40-year renewal of NRC License SNM-2505 will not result in a significant impact to the environment.

The NRC staff consulted with other federal and state agencies and Native American Indian tribes regarding the proposed action, including: the U.S. Fish and Wildlife Service, the National Oceanic and Atmospheric Administration (National Marine Fisheries Service), the Maryland Department of Natural Resources, the Maryland Department of the Environment, the Maryland Historic Trust, the Piscataway Indian Nation, the Piscataway Conoy Confederacy and Subtribes, the Cedarville Band of Piscataway Indians, and the Maryland Commission on African American History and Culture. These consultations ensured that the requirements of Section 7 of the Endangered Species Act and Section 106 of the National Historic Preservation Act were met and provided the designated state liaison agency the opportunity to comment on the proposed action and the EA.

## **II. Finding of No Significant Impact**

On the basis of the EA, the NRC has concluded that the proposed license renewal will not significantly affect the quality of the human environment. Therefore, preparation of an environmental impact statement is not warranted for the proposed action and a finding of no significant impact is appropriate.

## **III. Further Information**

Documents related to this action, including the license renewal application and supporting documentation, are available online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and
